Article 3. Safeguarding of cultural property

The High Contracting Parties undertake to prepare in time of peace for the safeguarding of cultural property situated within their own territory against the foreseeable effects of an armed conflict, by taking such measures as they consider appropriate.

Have you taken such measures?

Yes.

If yes, please provide specific information.

Since 2002, the National Institute of Anthropology and History (INAH) has been implementing the Cultural Heritage Disaster Prevention Program (PREVINAH), under which prevention and remedial action has been taken to protect movable and immovable cultural property that could be affected by a natural or anthropogenic disaster. One of the main challenges of PREVINAH is permanently monitoring events, that may cause damage to property, for example, called the Spring Equinox (March 21 each year), which are carried out mass visits to archaeological sites of the country, so continuous monitoring is performed, in order to avoid accidents resulting from disorderly behavior in large population centers or those produced by antisocial behavior.

To follow up on the security measures implemented for a possible contingency, there is a permanent contact between the delegates of each INAH Center with officials of each archaeological PREVINAH who are also reported supporting institutions such as the Red Cross, the State and Municipal Systems of Civil Protection, the nearest Military Section, emergency medical services, local authorities and firefighters. We have requested the support of institutions such as the Ministry of Environment and Natural
Resources, the Ministry of Public Security, the Police Rescue Squad and the Federal Highway Police.

Monitoring is done as many days as necessary, depending on the flow of visitors over holidays or weekends. Two daily reports a day are made, and immediately sent to the Director General of INAH and other areas of the Institute.
