Day 1: Effective Policies – Sharing policies and evaluating effectiveness

Monday, 12 October 2020

The focus of Day 1 will be on sharing knowledge about ‘What worked?’ with regard to distance learning policies. After months of large-scale experimentation with distance learning, panel discussions with high-level representatives of UN agencies, ministers, and experts will attempt to draw specific policy advice on the way ahead.

- What examples do we have of effective national distance learning programmes that have met the needs of all students, contained the loss of instructional time and of learning, and maintained the quality of learning?
- What examples do we have of effective national strategies to improve household access to digital devices and connectivity, in particular for students from disadvantaged and marginalized groups?
- What are effective strategies to ensure equitable access to distance education for learners from vulnerable groups, with a specific focus on female students and teachers, and learners with disabilities?
- How can teachers and parents be supported to facilitate distance learning, provide social care, and ensure effective learning engagement and progression?
- What experiences do we have in evaluating the effectiveness of national or large-scale distance learning programmes?
- What examples do we have of leveraging big data to inform policy planning and evaluation?

Day 2: Innovative Solutions – Showcasing innovative distance learning solutions

Tuesday, 13 October 2020

The focus of Day 2 shifts to innovative technology solutions. Day 2 will also be a good opportunity to feature solutions from MLW sponsors and members of the Global Education Coalition¹, and exhibitions from technology providers.

- What are the main functions and roles of diverse platforms in supporting distance learning? How can existing and emerging platforms be assessed in terms of effectiveness, efficiency, and long-term financial implications?
- What are innovative solutions to the development and curation of distance learning content, including Open Educational Resources (OER), to meet the needs of learners at different ages under diverse distance learning scenarios (online, TV, or radio)?
- What are trusted technology solutions to the learning and connection needs of individual teachers, students, classes, and institutions?
- What are the uncharted risks of engaging all students into long-term online learning? How can the risks be anticipated and mitigated?

Day 3: The Future – Setting out policy and research agendas to build back better

Wednesday, 14 October 2020

Day 3 is an opportunity to take stock of what still needs to be learned, and explore how education systems can emerge from the crisis stronger and more resilient to future disruptions.

- What paradigm shifts are needed for education after the pandemic? How can research accelerate progress to realize these changes?
- How can technologies be best leveraged to build open and flexible learning systems for all based on a network of learning spaces that better integrate formal educational institutions, homes and other community learning resources?
- What policy enablers, technology, and human pre-conditions need to be in place to build more resilient learning systems for sustainable futures?
