Submission #49

Personal information

Name  Hichem REZGUI
Organisation  E-Energy Magazine
Email address  hichem.hse@hotmail.com
Country/region  Algeria
Gender  Male

How would you define the stakeholder community or communities to which you belong?
- Intergovernmental organisation
- Journalism/media
- Individual capacity

Questions

1. What are your priorities for issues that should be addressed through the Internet Universality framework in each of these five categories?

<table>
<thead>
<tr>
<th>Rights</th>
<th>education, employment; youth self development, culture and tourism</th>
</tr>
</thead>
<tbody>
<tr>
<td>Openness</td>
<td></td>
</tr>
<tr>
<td>Accessibility</td>
<td></td>
</tr>
<tr>
<td>Multistakeholder participation</td>
<td></td>
</tr>
<tr>
<td>Cross-cutting indicators</td>
<td></td>
</tr>
</tbody>
</table>

2. Are there any existing indicators with which you are familiar that you think it would be useful to include in the ROAM indicators framework?
3. What do you think are the most important gaps in data/evidence required for monitoring Internet Universality and the ROAM principles? What approaches do you think could help to address these in your country, region or area of work?

<table>

<td></td>
<td>Archeological analysis, politics &amp; ideologies</td>
<td></td>
</tr>
<tr>
<td>Multistakeholder participation</td>
<td>fake news on the social medias</td>
<td>Getting the right informations</td>
<td></td>
</tr>
</tbody>
</table>

4. What experience or views do you have of indicators relating to the Internet which are concerned with gender and with children and young people?

It was soon clear thousands of people were unintentionally sharing articles full of misinformation.

5. How do you think you might use the indicator framework for Internet Universality once it has been developed?

Facebook for example is trying to do something about that. It is testing a new feature called the "i" button. When clicked, it gives the reader more information about the article they are reading.

6. How do you think that other stakeholders might use the framework?

The idea is to give people context about their news sources, so they can decide if articles are from publishers they trust, and if the stories themselves are credible.

7. Please add any other comments that you think will be helpful to UNESCO in developing the indicators framework.

Unlike many news organisations, we haven’t put up a paywall – we want to keep our journalism as open as we can. Such kind of electronic journalism takes a lot of time, money and hard work to produce. But we do it because we believe our perspective matters – because it might well be your perspective, too. If everyone who reads our reporting, who likes it, helps to support it, our future would be much more secure.

8. Please upload any documents that you think will be helpful here.
