Internet technical and professional community

Are there any suggestions that you wish to make in respect of the proposed themes, questions and indicators which are included in the framework as it stands?

On line internet dialogue for peace and Sustainability in South Sudan

Are there any suggestions that you wish to make in respect of the proposed themes, questions and indicators which are included in the framework as it stands?

I have been advocate on line dialogue for peace and reconciliation through social media Platform, Due to many YOUNG South Sudanese are internet because they preach on line tribalism and hate on social Media plate, We want internet partners promote on line dialogue for peace and reconciliation in South Sudan by creating website tool or social media plate form for many Users to online participate peace forum

What sources and means of verification would you recommend, from your experience, in relation to any of the questions and indicators that have been proposed?
