

## Submission # 41

**Name:**Omar Salim Said Al Shanfary

**Organization:**Information Technology Authority

**Country/Region:**Sultanate of Oman

**How would you define the stakeholder community or communities to which you belong?**

Government

**Are there any suggestions that you wish to make in respect of the proposed themes, questions and indicators which are included in the framework as it stands?**

To include indicators related to:

§ Awareness strategies, plans and projects to raise awareness about the use of the Internet and protecting Internet users (e.g.: child protection in the cyberspace).

§ Training programs for capacity building in the use of internet

- As those two topics are very important in the Internet universally, and many countries has its own strategies, plans and projects related to both.

**What sources and means of verification would you recommend, from your experience, in relation to any of the questions and indicators that have been proposed?**

§ Question: Is there a Cybersecurity Awareness strategy, plan, and project?

§ Indicator: Availability of awareness strategies plans and projects to raise awareness about the use of the Internet and protecting Internet users.

§ Question: Does your country has a training program for capacity building in the use of internet? (if yes , please provide the related statistics)

§ Indicator: Availability of training programs for capacity building in the use of internet.
