

Submission # 83

Name:Rolf H. Weber

Organization:University of Zurich

Country/Region:Switzerland

How would you define the stakeholder community or communities to which you belong?

Academic

Are there any suggestions that you wish to make in respect of the proposed themes, questions and indicators which are included in the framework as it stands?

Two remarks for further elaboration:

1. Possibly "ethics" and the consequences for the regulatory framework should be addressed in more detail.
2. Wouldn't make sense to add a section on artificial intelligence/algortihms/robots?

Best wishes
